

**INSTRUCTIONS FOR PRINTING YOUR COLOR KIT**  
(I suggest you print these instructions)

Download the Print Kit into your Computer. (Or tablet or smart phone, if you can print from them.)

Your Color Kit prints 10 pages of colors and information. You can print as many copies as you like so you may want to invest in extra paper. You can print them on any smooth, quality paper, bright white, usually 20 lb. HP is good and comes in 24 lb. paper, which is a tad heavier. If you want more durable paper and the best color rendition for you and your friends and family, here are suggestions.

You need the following to print your Color Kit and create your fans:

48 lb PAPER (or photo paper)  
SINGLE HOLE PUNCH  
ROUND HEAD PAPER FASTENERS

Glossy or Matte .  
Preferably 10 sheets at once  
Or, a safety pin or thin ribbon

OPTIONAL: CHECK BOOK COVER

Your bank can give you a vinyl one, usually for free

You can order on line from the major office supply chains: Staples, Office Depot/Office Max and Walmart.

We have printed the Kits on Epson, Canon, and HP. The smaller printers that promote their ability to print great photos have truer color rendition than office computers. They also often have photo quality ink as an option.

Below are suggested Brand Names for paper, fasteners, and a hole punch.

8 1/2 x 11 Matte Box of 150 sheets	\$32.99

(Unfortunately, this is an in-store only product so you can't order it online.) It is my favorite. The 50 sheet boxes (way less expensive) are no longer there so this product may be in process of being discontinued.

Or any non-porous, smooth paper at least 24 lb. This paper is thinner and less durable but the colors render well. Some off-brands are NOT good
